Subject Index

Volume 32, July–December 1998

A

Acetylcholine
- Endothelial Function and Common Carotid Artery Wall Thickening in Patients With Essential Hypertension, 25
- Endothelin-Dependent Tone Limits Acetylcholine-Induced Dilation of Resistance Coronary Vessels After Blockade of NO Formation in Conscious Dogs, 844
- Role of Nitric Oxide in Cyclosporine A–Induced Hypertension, 849

Adducin
- Human α-Adducin Gene, Blood Pressure, and Sodium Metabolism, 138

Adenosine
- Cardiovascular Effects of Nitric Oxide and Adenosine in the Nucleus Tractus Solitarii of Rats, 1034

Adenylyl cyclase
- Chamber-Specific Alterations of Norepinephrine Uptake Sites in Cardiac Hypertrophy, 831

Adrenal gland
- Differential Regulation of Angiotensin II Receptor Subtypes in the Adrenal Gland: Role of Aldosterone, 65
- Proadrenomedullin N-Terminal 20 Peptide: Minimal Active Region to Regulate Nicotinic Receptors, 907
- Regulation of Angiotensin II Receptor Expression by Nitric Oxide in Rat Adrenal Gland, 527

Adrenomedullin
- Adrenomedullin, a New Vasoactive Peptide, Is Increased in Preeclampsia, 758
- Proadrenomedullin N-Terminal 20 Peptide: Minimal Active Region to Regulate Nicotinic Receptors, 907

Adults
- Evidence for a Difference in Nitric Oxide Biosynthesis Between Healthy Women and Men, 730

Aging
- Augmented Cardiopulmonary and Integrative Sympathetic Baroreflexes but Attenuated Peripheral Vasoconstriction With Age, 298
- Large Artery Remodeling During Aging: Biaxial Passive and Active Stiffness, 437
- Quantification of Alterations in Structure and Function of Elastin in the Arterial Media, 170

AHA News
- AHA Journals at the Forefront of Cardiology: A Report on Excellence, 633

Albuminuria
- Ambulatory Blood Pressure and Urinary Albumin Excretion in Clinically Healthy Subjects, 71
- Dual Inhibition of Neutral Endopeptidase and Angiotensin-Converting Enzyme in Rats With Hypertension and Diabetes Mellitus, 778
- Transvascular and Urinary Leakage of Albumin in Atherosclerotic and Hypertensive Men, 318

Aldosterone
- Differential Regulation of Angiotensin II Receptor Subtypes in the Adrenal Gland: Role of Aldosterone, 65
- Effects of Acute ACE Inhibition on Pulsatile Renin and Aldosterone Secretion and Their Synchrony, 929

Aldosterone synthase
- Structural Analysis and Evaluation of the Aldosterone Synthase Gene in Hypertension, 198

Allopurinol
- Increased Kidney Xanthine Oxidoreductase Activity in Salt-Induced Experimental Hypertension, 902

Alzheimer's disease
- A Population-Based Study on Blood Pressure and Brain Atrophy in 85-Year-Olds, 404

Ammonia
- Prenatal Malnutrition-Induced Changes in Blood Pressure: Dissociation of Stress and Nonstress Responses Using Radiotelemetry, 108

Amniotic fluid
- Adrenomedullin, a New Vasoactive Peptide, Is Increased in Preeclampsia, 758

Androgens
- Testosterone Effects on Renal Norepinephrine Content and Release in Rats With Different Y Chromosomes, 880

Angiography
- Endothelial Nitric Oxide Synthase Gene Polymorphism and Acute Myocardial Infarction, 521

Angiotensin
- Assessment of Vasoactive Agents and Vascular Aging by the Second Derivative of Photoplethysmogram Waveform, 365
- Dual Inhibition of Neutral Endopeptidase and Angiotensin-Converting Enzyme in Rats With Hypertension and Diabetes Mellitus, 778
- Lack of Association Between Renin-Angiotensin System, Gene Polymorphisms, and Wall Thickness of the Radial and Carotid Arteries, 579
- MAP Kinase–Independent Signaling in Angiotensin II Regulation of Neuromodulation in SHR Neurons, 473
- A Memorial to Robert Tiegerstedt: The Centennial of Renin Discovery, 953
- Renovascular Hypertension in Bradykinin B_2-Receptor Knockout Mice, 503
- Transcription-Modulating Drugs: A New Frontier in the Treatment of Essential Hypertension, 380

Angiotensin-(1–7)
- Converting Enzyme Determines Plasma Clearance of Angiotensin-(1–7), 496

Angiotensin antagonist
- Effects of Eprosartan on Renal Function and Cardiac Hypertrophy in Rats With Experimental Heart Failure, 746

Angiotensin-converting enzyme
- AT_1 Receptor A/C^{1166} Polymorphism Contributes to Cardiac Hypertrophy in Subjects With Hypertrophic Cardiomyopathy, 825
- Converting Enzyme Determines Plasma Clearance of Angiotensin-(1–7), 496
- Differences in Tissue Angiotensin II–Forming Pathways by Species and Organs In Vitro, 514
- Effect of Genetic Deficiency of Angiotensinogen on the Renin-Angiotensin System, 223
- Pathways for Angiotensin II Generation in Intact Human Tissue: Evidence From Comparative Pharmacological Interruption of the Renin System, 387

Angiotensin-converting enzyme inhibitors
- Angiotensin-Converting Enzyme Inhibition, But Not Calcium Antagonism, Improves a Response of the Renal Vasculature to L-Arginine in Patients With Essential Hypertension, 16
- Effects of Acute ACE Inhibition on Pulsatile Renin and Aldosterone Secretion and Their Synchrony, 929
- Effects of Losartan and Enalapril on Small Artery Structure in Hypertensive Rats, 305
- A Memorial to Robert Tiegerstedt: The Centennial of Renin Discovery, 953

Angiotensin II
- Angiotensin II Induces $p67^{phox}$ mRNA Expression and NADPH Oxidase Superoxide Generation in Rabbit Aortic Adventitial Fibroblasts, 331
- Angiotensin II Type 1 Receptor: Relationship With Caveolae and Caveolin After Initial Agonist Stimulation, 459
- Early Induction of Transforming Growth Factor-β via Angiotensin II Type 1 Receptors Contributes to Cardiac Fibrosis Induced by Long-term Blockade of Nitric Oxide Synthesis in Rats, 273
- Effect of Activation and Inhibition of the Renin-Angiotensin System on Plasma PAI-1, 965
- Effects of Eprosartan on Renal Function and Cardiac Hypertrophy in Rats With Experimental Heart Failure, 746
- Effects of Losartan and Enalapril on Small Artery Structure in Hypertensive Rats, 305

Insulin-Mediated Growth in Aortic Smooth Muscle and the Vascular Renin-Angiotensin System, 482
Interaction of mRNAs for Angiotensin II Type 1 and Type 2 Receptors to Vascular Remodeling in Spontaneously Hypertensive Rats, 467
Microvasculature in Angiotensin II–Dependent Cardiac Hypertrophy in the Rat, 371
Overexpression of Bax Protein and Enhanced Apoptosis in the Left Ventricle of Spontaneously Hypertensive Rats: Effects of AT_1 Blockade With Losartan, 280
Pathways for Angiotensin II Generation in Intact Human Tissue: Evidence From Comparative Pharmacological Interruption of the Renin System, 387
Pressure Mediates Angiotensin II–Induced Arterial Hypertrophy and PDGF-A Expression, 452
Role of Calcium-Sensitive Tyrosine Kinase Pyk2/CAKβ/RAFTK in Angiotensin II–Induced Ras/ERK Signaling, 668
Role of NADH/NADPH Oxidase–Derived H_2O_2 in Angiotensin II–Induced Vascular Hypertrophy, 488

Angiotensin II, intracellular
Intracellular Angiotensin II Regulates the Inward Calcium Current in Cardiac Myocytes, 976

Angiotensin receptor antagonist
Angiotensin Receptor Blockade Blunts Hyperinsulinemia-Induced Hypertension in Rats, 235

Angiotensinogen
Editorial Commentary: Angiotensinogen Genotype and Blood Pressure Responses to Reduced Dietary NaCl and to Weight Loss, 402
Effect of Genetic Deficiency of Angiotensinogen on the Renin-Angiotensin System, 223
Insulin-Mediated Growth in Aortic Smooth Muscle and the Vascular Renin-Angiotensin System, 482
Serum Angiotensinogen Concentration in Relation to Gonadal Hormones, Body Size, and Genotype in Growing Young People, 875

Antibody Fab fragments
Both Brain Angiotensin II and "Ouabain" Contribute to Sympathoexcitation and Hypertension in Dahl S Rats on High Salt Intake, 1028

Antihypertensive agents
Characteristics of 9194 Patients With Left Ventricular Hypertrophy: The LIFE Study, 989
Reproducibility and Clinical Value of the Trough-to-Peak Ratio of the Antihypertensive Effect: Evidence From the Sample Study, 424

Antioxidants
Normalization of Blood Pressure and Renal Vascular Resistance in SHR With a Membrane-Permeable Superoxide Dismutase Mimetic: Role of Nitric Oxide, 59

Antisense elements
Elevated Fos Expression in the Nucleus Tractus Solitarii Is Associated With Reduced Baroreflex Response in Spontaneously Hypertensive Rats, 939

Aorta
Connection of Smooth Muscle Cells to Elastic Lamellae in Aorta of Spontaneously Hypertensive Rats, 166
Differences in Tissue Angiotensin II–Forming Pathways by Species and Organs In Vitro, 514
Expression of α_2-Adrenergic Receptors in Normal and Atherosclerotic Rabbit Aorta, 311
Relation Between Coronary Artery Disease, Aortic Stiffness, and Left Ventricular Structure in a Population Sample, 575
Relation Between Number of Cardiovascular Risk Factors/Events and Noninvasive Doppler Ultrasound Assessments of Aortic Compliance, 565
Smooth Muscle Tone and Arterial Wall Viscosity: An In Vivo/In Vitro Study, 360

Aortic rings
Role of Nitric Oxide in Cyclosporine A–Induced Hypertension, 849

Apoptosis
Overexpression of Bax Protein and Enhanced Apoptosis in the Left Ventricle of Spontaneously Hypertensive Rats: Effects of AT_1 Blockade With Losartan, 280

Arginine
Evidence for a Difference in Nitric Oxide Biosynthesis Between Healthy Women and Men, 730
Role of Nitric Oxide in Cyclosporine A–Induced Hypertension, 849

Arterial compliance
Determinants of Pulse Pressure, 556
Relation Between Coronary Artery Disease, Aortic Stiffness, and Left Ventricular Structure in a Population Sample, 575

Arterial distensibility
Differences in the Mechanical Properties of the Rat Carotid Artery In Vivo, In Situ, and In Vitro, 180
Effects of Prolonged Immobilization of the Limb on Radial Artery Mechanical Properties, 584

Arteries
Human Spiral Artery Renin-Angiotensin System, 683
Insulin and Insulin-like Growth Factor-I Cause Coronary Vasorelaxation In Vitro, 228
Lack of Association Between Renin-Angiotensin System, Gene Polymorphisms, and Wall Thickness of the Radial and Carotid Arteries, 579
Large Artery Remodeling During Aging: Biaxial Passive and Active Stiffness, 437
Overview: Recent Advances on Large Arteries in Hypertension, 156
Smooth Muscle Relaxation: Effects on Arterial Compliance, Distensibility, Elastic Modulus, and Pulse Wave Velocity, 356
Smooth Muscle Tone and Arterial Wall Viscosity: An In Vivo/In Vitro Study, 360
Structural Vascular Changes in Hypertension: Role of Angiotensin II, Dietary Sodium Supplementation, Blood Pressure, and Time, 654

Arterioles
Microvasculature in Angiotensin II–Dependent Cardiac Hypertrophy in the Rat, 371

Association
G Protein β3 Subunit Variant and Essential Hypertension in Japanese, 935

Association study
Structural Analysis and Evaluation of the Aldosterone Synthase Gene in Hypertension, 198

Atenolol
Characteristics of 9194 Patients With Left Ventricular Hypertrophy: The LIFE Study, 989

Atherosclerosis
Ambulatory Blood Pressure and Urinary Albumin Excretion in Clinically Healthy Subjects, 71
α_1-Adrenergic Plus Angiotensin Receptor Blockade Reduces Atherosclerosis in Apolipoprotein E–Deficient Mice, 1044
Conditioned Medium From HepG2 Cells Transfected With Human Apolipoprotein(a) Gene Stimulates Growth of Human Vascular Smooth Muscle Cells: Effects of Overexpression of Human Apolipoprotein(a) Gene, 215
Contribution of Nitric Oxide to Reactive Hyperemia: Impact of Endothelial Dysfunction, 9
Endothelial Nitric Oxide Synthase Gene Polymorphism and Acute Myocardial Infarction, 521
Expression of α_2-Adrenergic Receptors in Normal and Atherosclerotic Rabbit Aorta, 311
Nitric Oxide Synthase Expression in Endothelial Cells Exposed to Mechanical Forces, 351
Relation Between Number of Cardiovascular Risk Factors/Events and Noninvasive Doppler Ultrasound Assessments of Aortic Compliance, 565
Stimulatory Interaction Between Vascular Endothelial Growth Factor and Endothelin-1 on Each Gene Expression, 89
Transvascular and Urinary Leakage of Albumin in Atherosclerotic and Hypertensive Men, 318

Atrial natriuretic factor
ANP and Bradycardic Reflexes in Hypertensive Rats: Influence of Cardiac Hypertrophy, 548

Augmentation index
Assessment of Vasoactive Agents and Vascular Aging by the Second Derivative of Photoplethysmogram Waveform, 365

Autocrine-paracrine
Negative Regulation of Local Hepatocyte Growth Factor Expression by Angiotensin II and Transforming Growth Factor-β in Blood Vessels: Potential Role of HGF in Cardiovascular Disease, 444

Autonomic nervous system
Baroreflex Control of Sympathetic Nerve Activity and Heart Rate in Obstructive Sleep Apnea, 1039

Reduced Heart Rate Variability and New-Onset Hypertension: Insights Into Pathogenesis of Hypertension: The Framingham Heart Study, 293

Awareness

Blood Pressure in Spain: Distribution, Awareness, Control, and Benefits of a Reduction in Average Pressure, 998

B

Baroreceptors

Baroreflex Control of Sympathetic Nerve Activity and Heart Rate in Obstructive Sleep Apnea, 1039

Baroreflex

ANP and Bradycardic Reflexes in Hypertensive Rats: Influence of Cardiac Hypertrophy, 548

Both Brain Angiotensin II and "Ouabain" Contribute to Sympathoexcitation and Hypertension in Dahl S Rats on High Salt Intake, 1028

Elevated Fos Expression in the Nucleus Tractus Solitarii Is Associated With Reduced Baroreflex Response in Spontaneously Hypertensive Rats, 939

Bax

Overexpression of Bax Protein and Enhanced Apoptosis in the Left Ventricle of Spontaneously Hypertensive Rats: Effects of AT_1 Blockade With Losartan, 280

Bcl-2

Overexpression of Bax Protein and Enhanced Apoptosis in the Left Ventricle of Spontaneously Hypertensive Rats: Effects of AT_1 Blockade With Losartan, 280

Biallelic polymorphism

Structural Analysis and Evaluation of the Aldosterone Synthase Gene in Hypertension, 198

Blacks

Importance of the Renin System in Determining Blood Pressure Fall With Salt Restriction in Black and White Hypertensives, 820

Parameters of Lymphocyte Na^+-Ca^{2+} Regulation and Blood Pressure: The Gender Effect, 869

Blood flow

Acute Endothelium-Mediated Vasodilation Is Not Impaired at the Onset of Diabetes, 541

Insulin Resistance and the Effect of Insulin on Blood Pressure in Essential Hypertension, 243

Relationship Between Insulin Sensitivity and Maximal Forearm Blood Flow in Young Men, 838

Blood pressure

α_1-Adrenergic Plus Angiotensin Receptor Blockade Reduces Atherosclerosis in Apolipoprotein E–Deficient Mice, 1044

Angiotensinogen Genotype, Sodium Reduction, Weight Loss, and Prevention of Hypertension: Trials of Hypertension Prevention, Phase II, 393

Augmented Cardiopulmonary and Integrative Sympathetic Baroreflexes but Attenuated Peripheral Vasoconstriction With Age, 298

Baroreflex Control of Sympathetic Nerve Activity and Heart Rate in Obstructive Sleep Apnea, 1039

Blood Pressure in Spain: Distribution, Awareness, Control, and Benefits of a Reduction in Average Pressure, 998

Chronic Nitric Oxide Inhibition Model Six Years On, 958

Chronic Sodium Balance and Blood Pressure Response to Captopril in Conscious Mice, 923

Clustering of Endothelial Markers of Vascular Damage in Human Salt-Sensitive Hypertension: Influence of Dietary Sodium Load and Depletion, 862

Converting Enzyme Determines Plasma Clearance of Angiotensin-(1–7), 496

Dual Inhibition of Neutral Endopeptidase and Angiotensin-Converting Enzyme in Rats With Hypertension and Diabetes Mellitus, 778

Editorial Commentary: Angiotensinogen Genotype and Blood Pressure Responses to Reduced Dietary NaCl and to Weight Loss, 402

Effects of Dietary Fish and Weight Reduction on Ambulatory Blood Pressure in Overweight Hypertensives, 710

Effects of Magnesium Supplementation in Hypertensive Patients: Assessment by Office, Home, and Ambulatory Blood Pressures, 260

Estimation of Blood Pressure Variability From 24-Hour Ambulatory Finger Blood Pressure, 52

Familial Hypertension, Insulin, Sympathetic Activity, and Blood Pressure Elevation, 96

G-Protein β3 Subunit Gene (*GNB3*) Variant in Causation of Essential Hypertension, 1094

Human α-Adducin Gene, Blood Pressure, and Sodium Metabolism, 138

Hypertension Among Siblings of Persons With Premature Coronary Heart Disease, 123

Importance of the Renin System in Determining Blood Pressure Fall With Salt Restriction in Black and White Hypertensives, 820

Intralipid Enhances α_1-Adrenergic Receptor–Mediated Pressor Sensitivity, 693

Inverse Relationship Between Fenfluramine-Induced Prolactin Release and Blood Pressure in Humans, 972

Isolation of a Chromosome 1 Region That Contributes to High Blood Pressure and Salt Sensitivity, 636

A Memorial to Robert Tiegerstedt: The Centennial of Renin Discovery, 953

Normalization of Blood Pressure and Renal Vascular Resistance in SHR With a Membrane-Permeable Superoxide Dismutase Mimetic: Role of Nitric Oxide, 59

A Population-Based Study on Blood Pressure and Brain Atrophy in 85-Year-Olds, 404

Pulse Pressure and Cardiovascular Mortality in Normotensive and Hypertensive Subjects, 560

Role of nNOS in Blood Pressure Regulation in eNOS Null Mutant Mice, 856

Static and Dynamic Mechanical Properties of the Carotid Artery From Normotensive and Hypertensive Rats, 346

Transcription-Modulating Drugs: A New Frontier in the Treatment of Essential Hypertension, 380

Blood pressure monitoring

Ambulatory Pulse Pressure: A Potent Predictor of Total Cardiovascular Risk in Hypertension, 983

Blood pressure monitoring, ambulatory

Early Cardiac Changes After Menopause, 764

Estimation of Blood Pressure Variability From 24-Hour Ambulatory Finger Blood Pressure, 52

Impact of Shift Work and Race/Ethnicity on the Diurnal Rhythm of Blood Pressure and Catecholamines, 417

Reproducibility and Clinical Value of the Trough-to-Peak Ratio of the Antihypertensive Effect: Evidence From the Sample Study, 424

Statistical Base Value of 24-Hour Blood Pressure Distribution in Patients With Essential Hypertension, 430

Blood pressure variability

Estimation of Blood Pressure Variability From 24-Hour Ambulatory Finger Blood Pressure, 52

Blood pressure, ambulatory

Ambulatory Blood Pressure and Urinary Albumin Excretion in Clinically Healthy Subjects, 71

Effects of Magnesium Supplementation in Hypertensive Patients: Assessment by Office, Home, and Ambulatory Blood Pressures, 260

Reference Values for 24-Hour Ambulatory Blood Pressure Monitoring Based on a Prognostic Criterion: The Ohasama Study, 255

Blood vessels

High Sodium Intake Decreases Pressure-Induced (Myogenic) Tone and Flow-Induced Dilation in Resistance Arteries From Hypertensive Rats, 176

Relationship Between Insulin Sensitivity and Maximal Forearm Blood Flow in Young Men, 838

Body mass index

Insulin Resistance in Hypertension Is Associated With Body Fat Rather Than Blood Pressure, 115

Serum Angiotensinogen Concentration in Relation to Gonadal Hormones, Body Size, and Genotype in Growing Young People, 875

Book Reviews

Clinical Hypertension, 186

Vascular Endothelium: Pharmacologic and Genetic Manipulations, 786

Bradykinin

Bradykinin-Induced Reductions in Collagen Gene Expression Involve Prostacyclin, 84

C

Calcium
Biophysical Signals Underlying Myogenic Responses in Rat Interlobular Artery, 1060
Chloride Regulates Afferent Arteriolar Contraction in Response to Depolarization, 1066
Nitric Oxide Metabolism in Erythropoietin-Induced Hypertension: Effect of Calcium Channel Blockade, 724
Parameters of Lymphocyte Na^+-Ca^{2+} Regulation and Blood Pressure: The Gender Effect, 869
Calcium antagonist
Angiotensin-Converting Enzyme Inhibition, But Not Calcium Antagonism, Improves a Response of the Renal Vasculature to L-Arginine in Patients With Essential Hypertension, 16
Calcium channel blockers

Assessment of Vasoactive Agents and Vascular Aging by the Second Derivative of Photoplethysmogram Waveform, 365
Secretion
Appropriate Regulation of Human Renin Gene Expression and Secretion in 45-kb Human Renin Transgenic Mice, 205
Serotonin
Inverse Relationship Between Fenfluramine-Induced Prolactin Release and Blood Pressure in Humans, 972
Shc
Arachidonate-Induced Tyrosine Phosphorylation of Epidermal Growth Factor Receptor and Shc-Grb2-Sos Association, 1089
Shear stress
High Sodium Intake Decreases Pressure-Induced (Myogenic) Tone and Flow-Induced Dilation in Resistance Arteries From Hypertensive Rats, 176
Signal Transduction of Mechanical Stresses in the Vascular Wall, 338
Sialic acid
Erythrocyte Disaggregation Shear Stress, Sialic Acid, and Cell Aging in Humans, 324
Signal transduction
Angiotensin II Type 1 Receptor: Relationship With Caveolae and Caveolin After Initial Agonist Stimulation, 459
Sleep
Statistical Base Value of 24-Hour Blood Pressure Distribution in Patients With Essential Hypertension, 430
Sleep apnea
Baroreflex Control of Sympathetic Nerve Activity and Heart Rate in Obstructive Sleep Apnea, 1039
Sodium
Chronic Sodium Balance and Blood Pressure Response to Captopril in Conscious Mice, 923
Clustering of Endothelial Markers of Vascular Damage in Human Salt-Sensitive Hypertension: Influence of Dietary Sodium Load and Depletion, 862
Effect of Activation and Inhibition of the Renin-Angiotensin System on Plasma PAI-1, 965
High Sodium Intake Decreases Pressure-Induced (Myogenic) Tone and Flow-Induced Dilation in Resistance Arteries From Hypertensive Rats, 176
Human α-Adducin Gene, Blood Pressure, and Sodium Metabolism, 138
Increased Kidney Xanthine Oxidoreductase Activity in Salt-Induced Experimental Hypertension, 902
Obesity, Salt Intake, and Renal Perfusion in Healthy Humans, 144
Parameters of Lymphocyte Na^+-Ca^{2+} Regulation and Blood Pressure: The Gender Effect, 869
Renal 11β-Hydroxysteroid Dehydrogenase in Genetically Salt-Sensitive Hypertensive Rats, 1077
Role of Nitric Oxide and Prostaglandins in the Long-term Control of Renal Function, 33
Sodium channels
Genetic Analysis of the β Subunit of the Epithelial Na^+ Channel in Essential Hypertension, 129
Sodium excretion
Intrarenal Nitric Oxide Activity and Pressure Natriuresis in Anesthetized Dogs, 266
Sodium nitroprusside
Endothelial Function and Common Carotid Artery Wall Thickening in Patients With Essential Hypertension, 25
Smooth Muscle Tone and Arterial Wall Viscosity: An In Vivo/In Vitro Study, 360
Sodium pump
Bromocriptine Regulates Angiotensin II Response on Sodium Pump in Proximal Tubules, 1054
Sodium, dietary
Effect of Genetic Deficiency of Angiotensinogen on the Renin-Angiotensin System, 223
Importance of the Renin System in Determining Blood Pressure Fall With Salt Restriction in Black and White Hypertensives, 820
Rapid Communication: Salt-Sensitive Hypertension Induced by Sensory Denervation: Introduction of a New Model, 649
Steroid 11β-hydroxylase
Structural Analysis and Evaluation of the Aldosterone Synthase Gene in Hypertension, 198
Steroids
Testosterone Effects on Renal Norepinephrine Content and Release in Rats With Different Y Chromosomes, 880
Stiffness
Static and Dynamic Mechanical Properties of the Carotid Artery From Normotensive and Hypertensive Rats, 346
Stress
Basal and Stimulated Sympathetic Responses After Epinephrine: No Evidence of Augmented Responses, 1016
Both Brain Angiotensin II and "Ouabain" Contribute to Sympathoexcitation and Hypertension in Dahl S Rats on High Salt Intake, 1028
Prenatal Malnutrition-Induced Changes in Blood Pressure: Dissociation of Stress and Nonstress Responses Using Radiotelemetry, 108
Stress, mechanical
Nitric Oxide Synthase Expression in Endothelial Cells Exposed to Mechanical Forces, 351
Quantification of Alterations in Structure and Function of Elastin in the Arterial Media, 170
Stretch
Signal Transduction of Mechanical Stresses in the Vascular Wall, 338
Superoxide dismutase
Normalization of Blood Pressure and Renal Vascular Resistance in SHR With a Membrane-Permeable Superoxide Dismutase Mimetic: Role of Nitric Oxide, 59
Role of NADH/NADPH Oxidase–Derived H_2O_2 in Angiotensin II–Induced Vascular Hypertrophy, 488
Superoxides
Angiotensin II Induces $p67^{phox}$ mRNA Expression and NADPH Oxidase Superoxide Generation in Rabbit Aortic Adventitial Fibroblasts, 331
Felodipine Inhibits Free-Radical Production by Cytokines and Glucose in Human Smooth Muscle Cells, 1011
Glucocorticoids Inhibit Superoxide Anion Production and p22 Phox mRNA Expression in Human Aortic Smooth Muscle Cells, 1083

Sympathetic nervous system
Baroreflex Control of Sympathetic Nerve Activity and Heart Rate in Obstructive Sleep Apnea, 1039
Basal and Stimulated Sympathetic Responses After Epinephrine: No Evidence of Augmented Responses, 1016
Both Brain Angiotensin II and "Ouabain" Contribute to Sympathoexcitation and Hypertension in Dahl S Rats on High Salt Intake, 1028
Familial Hypertension, Insulin, Sympathetic Activity, and Blood Pressure Elevation, 96
I_1-Imidazoline Agonist Moxonidine Decreases Sympathetic Nerve Activity and Blood Pressure in Hypertensives, 1022

T

Tachycardia
Raised Cerebrovascular Resistance in Idiopathic Orthostatic Intolerance: Evidence for Sympathetic Vasoconstriction, 699
Tamoxifen
Effects of Gonadal Steroids and Their Antagonists on DNA Synthesis in Human Vascular Cells, 39
Telemetry
Hepatic Denervation Chronically Elevates Arterial Pressure in Wistar-Kyoto Rats, 46
Tempol
Normalization of Blood Pressure and Renal Vascular Resistance in SHR With a Membrane-Permeable Superoxide Dismutase Mimetic: Role of Nitric Oxide, 59
Testosterone
Serum Angiotensinogen Concentration in Relation to Gonadal Hormones, Body Size, and Genotype in Growing Young People, 875
Thiazolidinediones
Transcription-Modulating Drugs: A New Frontier in the Treatment of Essential Hypertension, 380
Tiegerstedt, R.
A Memorial to Robert Tiegerstedt: The Centennial of Renin Discovery, 953
Thromboxane
Biphasic Effect of Bradykinin on Rabbit Afferent Arterioles, 287
Tissue plasminogen activator
Effect of Activation and Inhibition of the Renin-Angiotensin System on Plasma PAI-1, 965
Training
Effects of Prolonged Immobilization of the Limb on Radial Artery Mechanical Properties, 584
Transcription
Transcription-Modulating Drugs: A New Frontier in the Treatment of Essential Hypertension, 380
Transduction
Overview: Recent Advances on Large Arteries in Hypertension, 156
Transforming growth factors
Conditioned Medium From HepG2 Cells Transfected With Human Apolipoprotein(a) Gene Stimulates Growth of Human Vascular Smooth Muscle Cells: Effects of Overexpression of Human Apolipoprotein(a) Gene, 215
Trimethaphan
Uncoupling of the Baroreflex by N_N-Cholinergic Blockade in Dissecting the Components of Cardiovascular Regulation, 101
Trough-to-peak ratio
Reproducibility and Clinical Value of the Trough-to-Peak Ratio of the Antihypertensive Effect: Evidence From the Sample Study, 424
Tyrosine hydroxylase
Positive Association of Tyrosine Hydroxylase Microsatellite Marker to Essential Hypertension, 676
Tyrosine kinase, calcium-sensitive
Role of Calcium-Sensitive Tyrosine Kinase Pyk2/CAKβ/RAFTK in Angiotensin II–Induced Ras/ERK Signaling, 668

V

Vascular aging
Assessment of Vasoactive Agents and Vascular Aging by the Second Derivative of Photoplethysmogram Waveform, 365
Vascular diseases
Transvascular and Urinary Leakage of Albumin in Atherosclerotic and Hypertensive Men, 318
Vascular reactivity
Nitric Oxide–Dependent Vasodilation in Young Spontaneously Hypertensive Rats, 735
Vascular remodeling
Overview: Recent Advances on Large Arteries in Hypertension, 156
Vascular resistance
Determinants of Pulse Pressure, 556
Effects of Losartan and Enalapril on Small Artery Structure in Hypertensive Rats, 305
Vasoactive agents
Assessment of Vasoactive Agents and Vascular Aging by the Second Derivative of Photoplethysmogram Waveform, 365
Vasoconstriction
Role of Nitric Oxide and Prostaglandins in the Long-term Control of Renal Function, 33
Vasodilation
Acute Endothelium-Mediated Vasodilation Is Not Impaired at the Onset of Diabetes, 541
Chronic Nitric Oxide Inhibition Model Six Years On, 958
Insulin Resistance and the Effect of Insulin on Blood Pressure in Essential Hypertension, 243
Smooth Muscle Relaxation: Effects on Arterial Compliance, Distensibility, Elastic Modulus, and Pulse Wave Velocity, 356
Thiazide-Induced Vasodilation in Humans Is Mediated by Potassium Channel Activation, 1071
Vasodilator Response to Systemic But Not to Local Hyperinsulinemia in the Human Forearm, 740
Vasopressin
Arginine Vasopressin–Mediated Stimulation of Nitric Oxide Within the Rat Renal Medulla, 896
Effect of Vasopressin Antagonism on Structure and Mechanics of Small Arteries and Vascular Expression of Endothelin-1 in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 770
Vasorelaxation
Clustering of Endothelial Markers of Vascular Damage in Human Salt-Sensitive Hypertension: Influence of Dietary Sodium Load and Depletion, 862
Ventricular function, left
Relation Between Coronary Artery Disease, Aortic Stiffness, and Left Ventricular Structure in a Population Sample, 575
Ventricular remodeling
Maladaptive Remodeling of Cardiac Myocyte Shape Begins Long Before Failure in Hypertension, 753
Vessels
Effects of Prolonged Immobilization of the Limb on Radial Artery Mechanical Properties, 584
Overview: Recent Advances on Large Arteries in Hypertension, 156
Viscosity
Smooth Muscle Tone and Arterial Wall Viscosity: An In Vivo/In Vitro Study, 360
Static and Dynamic Mechanical Properties of the Carotid Artery From Normotensive and Hypertensive Rats, 346

W

Waist-to-hip ratio
Insulin Resistance in Hypertension Is Associated With Body Fat Rather Than Blood Pressure, 115
Wall thickness
Lack of Association Between Renin-Angiotensin System, Gene Polymorphisms, and Wall Thickness of the Radial and Carotid Arteries, 579
Weight control
Effects of Dietary Fish and Weight Reduction on Ambulatory Blood Pressure in Overweight Hypertensives, 710
Whites
Importance of the Renin System in Determining Blood Pressure Fall With Salt Restriction in Black and White Hypertensives, 820
Windkessel
Determinants of Pulse Pressure, 556
Work schedule tolerance
Impact of Shift Work and Race/Ethnicity on the Diurnal Rhythm of Blood Pressure and Catecholamines, 417

X

Xanthine oxidoreductase
Increased Kidney Xanthine Oxidoreductase Activity in Salt-Induced Experimental Hypertension, 902
